BRISTON 

## The new faces of **Streamliner Kennedy**

Watches with strong personalities, the **Streamliner Kennedy** collection has become the flagship of the brand's commitment and highlights its evolution towards a resolutely neo-vintage style.

Launched this winter and available in three distinct models (chronograph, automatic, and medium model), these new **Streamliner Kennedy** watches are characterized above all by their double-layered dials in royal blue or British green. While the outer rim is adorned with a sunray finish, the lower central section is delicately hand-guilloché, adding sophistication to these dials.

The crown, positioned at 12 o'clock (except on the chronograph), is adorned with a lapis lazuli or malachite cabochon, adding a touch of sophistication.

The meticulously crafted finish of the case is a key feature of this collection. The tortoiseshell-style acetate sides feature a mirror-polished finish, and each case is securely fastened by two side screws, ensuring perfect integration of the materials.

Also available as accessories, **BRISTON** has chosen to assemble these new models on straps matching the color of the dial to create a cohesive whole.

## The new BRISTON steel bracelets for **Streamliner Kennedy**

*For purists, a brand new stainless steel bracelet, developed and specially created by BRISTON, offers a perfect alchemy of form and function, aesthetics and technology, designed to be both robust and comfortable, and integrated into the **Streamliner Kennedy** case.*

*Also available as an accessory, BRISTON has chosen to assemble the chronograph, automatic, and medium-sized models on this new steel bracelet, combining functionality and style.*

*The purity of the lines and the fine craftsmanship define this new bracelet. The square design of the central links echoes the case shape. Particular attention has been paid to the finish of each of these links, with the mirror polish or horizontal brushing of the central links contrasting with the vertical brushing of the H-shaped links.*

*The ultimate in sophistication for models equipped with a crown at 12 o'clock, the first link has a notch that preserves the functionality of the winding mechanism and ensures that the bracelet integrates perfectly with the case.*

*This bracelet also stands out for its double presto system, which allows it to adapt to every **Streamliner Kennedy** case. This ingenious system allows BRISTON watch owners to adapt the bracelet to their watch without losing its interchangeability with other bracelets.*

*For optimal comfort, the **Streamliner Kennedy** steel bracelet is equipped with a folding clasp to prevent accidental opening.*

# Streamliner KENNEDY

## CASE

Size: 36 x 36 mm

Dial opening: 23.5 x 23.5 mm

Thickness: 10 mm

Side flanks in Italian-made tortoiseshell acetate: hand-polished
