BRISTON 

In 2022, Briston starts the year by introducing a new pillar of its quartz range with the Clubmaster Elegant. Tribute to the watches of 1950s, reflecting a minimalist aesthetic that combines tension and curves in a contemporary spirit, Briston is introducing a new thin case size (37mm) equipped with a fluted bezel as well as elegant dials adorned with printed indexes.

In second part, the brand has decided to extend the Streamliner range & respond to a growing demand for digital watches. It allows the brand to introduce a new small case size (37mm) and above all; to reach a younger clientele with a modern timepiece!

Briston also completes its Streamliner Adventure collection launched in 2021 by emphasizing the work of materials, finishes and surface treatments. This year, the brand proposes to us an exuberant and colourful new men's collection accentuated by a painstaking work on the dial delicately adorned with Superluminova®: the new Streamliner Adventure Swing!

For the third period of the year, Briston has decided to present a sporty chic version with its integrated barrel-cambered case design, embossed dials with "waffle" pattern & vulcanized rubber strap. The new icon of the French brand is called the Streamliner Urban - it features a two eye chronograph - a complication perfectly adapted to the rhythm of urban life. The Streamliner Urban retains all the brand's cherished codes, but in a range of sporty-chic and urban timepieces that did not exist before.

Brice Jauret

BRISTON COLLECTIONS

CLUBMASTER COLLECTION

The Clubmaster collection is defined by its specific shape: square-cambered. Briston offers different materials to dress this very retro-chic case shape: acetate of cellulose or stainless steel with matt, satin brushed, mirror-polished or PVD treatments on the case. The cellulose acetate is a noble material very popular in the high-end eyewear. Developed from 70% of fiber and flower of cotton, it is a natural, hypoallergenic material. Our steel case is made of premium grade 316L, corrosion-resistant stainless steel. Briston has developed several declinations of this shape.

STREAMLINER COLLECTION

After seven years of creations with its Clubmaster cushion line, Briston creates a totally new line with a barrel-cambered shape opening the possibilities scope and allowing all promising areas and form of expression: the Streamliner. Its smooth lines establish a new vision of watchmaking elegance, while at the same time concurring with codes of a watch inspired by Streamline style. Briston goes back in time and draws its inspiration from Streamline American style, created in the 1930's and synonymous of modern design. Modern Streamline takes root from Art deco but however stands out from it by introducing smoother and more sensual lines. With its refined design, simultaneously dynamic and fluid, the Streamliner model case was developed to provide maximum comfort around the wrist.

CLUBMASTER CLASSIC

The Clubmaster Classic was born from the marriage of shape and materials. With its “cambered square” shape which comes straight from the Roaring Twenties and lends it a unique, yet classically horological look in a standardized round watch segment. This elegant and timeless watch is made with a 40mm case in cellulose acetate.

CLUBMASTER ELEGANT

With this new model, Briston creates a collection with timeless aesthetics, the Clubmaster Elegant presents a sophisticated silhouette, all in dynamic line and neat details through thin cases whose elegance is inspired by timepieces of the 1950s .

Behind its assumed minimalism hides a concern for every detail:

- 37mm case surmounted by a fluted bezel and assembled with a fluted crown
- black or silver-white dials highlighted by embossed indexes around the circumference
- Sword-shaped hands that add character to this novelty.

CLUBMASTER LADY

Briston creates a watch jewel with its rounded curves. A small but very feminine watch with a 24 mm case adorned with a black onyx cabochon and originally assembled on double tour NATO strap. The Clubmaster Lady will be suitable for every woman looking for a watch making her unique. In addition, Briston has developed a large choice of NATO, leather straps and Milanese mesh bands in double or simple tour.

CLUBMASTER TRAVELER WORLDTIME

Into the continuity of the Clubmaster Traveler GMT, Briston enhances its collection of watches dedicated to the world of travel with the Clubmaster Traveler Worldtime limited at 500 pieces. In addition to the GMT complication, the second crown at 2 o'clock positioned enables the setting of the black inner bezel and to read the time simultaneously in the 24 time zones of the globe. Equipped with a fixed 24-hour ring punctuated by a day / night indication, you just have to put the city of residence opposite the number corresponding to your local time on the 24-hour ring. The GMT red or orange lacquered hand will tell you the reference time in a first time zone (that of the travel place for example), which can be read on the ring graduation.

The Clubmaster Traveler Worldtime is a timeless classic in form and function for watches collectors.

CLUBMASTER TRAVELER GMT

Briston launches a watch dedicated to the world of travel. With a 500 pieces special edition, the Clubmaster Traveler GMT is a fine combination of modernity and pure watch classicism. Fitted into a 42mm case design easily identifiable thanks to its two right side crowns is driven for the first time with the Swiss Sellita SW330-1 caliber. Controlled by the crown at two o'clock, the bidirectional rotating inner ring is fitted with a 24-hour plus a day/night indicator which can easily allow to its owner to read the hour of the second time zone. Frequent travelers should always be on time while wearing their Clubmaster Traveler GMT!

STREAMLINER SKELETON

The new Streamliner Skeleton is the purest combination of watchmaking excellence and love for design and beautiful objects inspired by the Streamline style. With its dynamic and fluid design, the Streamliner 42x42 mm case was developed to provide a maximum comfort around the wrist.

Crafted with new smoked acetate or in stainless steel, cut sections characterize and enhance the case curve. A particular attention is paid to steel and rose gold PVD versions as the flanks, decorated with a mirror polishing finishing, adding light and contrasting with the case body which is vertically brushed finished.

To balance with the case lines, this new model's complexity lies in its dials, composed of three superimposed layers. Finally, the new Miyota 8N40 skeleton automatic movement with a small second at 5 o'clock sublimates the work on the dial, offering a contemporary version anchored into the DNA of this collection.

STREAMLINER DIGITAL

This year, Briston goes back in time and takes its inspiration from the first quartz electronic watches launched in the 70s and presents us with a new Streamliner with a retro-futuristic style, more dynamic, more modern and trendier for young people in search of freedom and escape: the Streamliner Digital.

With its unisex case size (37mm), this new Digital model is distinguished by its emblematic Streamliner tonneau-camber shape. In both acetate and steel, the cut edges define and accentuate the curves of the case. A particular attention has been paid to the steel versions treated with rose gold PVD with its decorated flanks in a mirror-polished finish that adds light and contrasts with the vertically brushed case body.

Digital Steel 37 mm

SPECIFICATIONS

Brushed 316L Stainless Steel case and polished flankers

Case size: 37 x 37 mm

Dial opening: 28 mm

Thickness: 10.90 mm

Crystal: Domed K1 mineral crystal - 2 mm thickness

Movement: Digital

Functions: Lighting, timing, alarm, date, digital timee

Water resistance to: 50 m / 5 ATM

STREAMLINER DIGITAL STEEL

STREAMLINER URBAN

Two years after the launch of its Streamliner model, Briston has decided to introduce a new contemporary icon for urban adventure enthusiasts.

The Streamliner Urban chronograph retains all the brand's cherished codes, but in a range of sporty-chic and urban timepieces that did not exist before.

In 42mm case size, the barrel-camber-shaped bezel with its four screws becomes the distinctive element of this novelty. Featuring a modular construction, the case also uses tortoise shell cellulose acetate for its body, the Briston unique feature. Another signature of its personality, the dial of the Streamliner Urban chronograph is delicately embossed with a very watchmaking "waffle» pattern.

Finally, Briston has chosen to assemble these novelties on a brand new vulcanized rubber strap integrated to the case by a screw system so that the two elements merge & create a coherent whole.

Urban Acetate 42 mm

Acetate case with bezel in stainless steel

Case size: 42 x 42 mm

Dial opening: 34mm

Thickness: 12 mm

Crystal: K1 resistant mineral glass - 2.80 mm thickness

Quartz movement: Miyota OS21

Functions: Chronograph date 2 counters

Water resistance to: 100 m / 10 ATM
